

Our client is a diversified manufacturer of highly engineered industrial products. With a tradition of more than 150 years our client provides products and solutions to customers in the aerospace, electronics, petrochemical, power generation and many other markets. More than 10.000 people around the world are dedicated to provide every day excellence in customer service, quality and processes. To strengthen our EHS organization and our EHS culture we are looking for a

REGIONAL EHS COMPLIANCE MANAGER (M/W/D)

Principal Responsibilities

- Conduct regular EHS audits and reviews across different locations to assess execution of ongoing compliance with required standards, identify gaps and recommend effective solutions
- Evaluate the efficiency of EHS control systems and recommend effective improvements
- Provide guidance in the development of robust and effective EHS compliance controls and direction in the overall roll-out and execution strategies for controls
- Support sites in root cause investigation processes when safety problems arise
- Provide guidance, recommendations and best practices to sites on how to achieve expectations on conformity matters, and how to maintain compliance once achieved
- Educate & coach sites on EHS matters, including the regulations & standards and the impact for non compliance
- Collaborate with globally approved 3rd party EHS auditors, evaluate the effectiveness of auditors and make recommendations on on-going partnership with them
- Report out on current EHS compliance performance for each site under scope; provide updates on overall record and key actions to achieve compliance standards

Required Qualifications/ Experience

- Bachelor's degree or equivalent in Occupational Health & Safety or a related, relevant field.
- 5+ years of job related experience in industrial manufacturing environment.
- Experience with auditing a broad range of EHS programs in a number of different manufacturing environments
- Knowledge and experience of working with and applying EHS regulatory requirements and national and international industry safety standards
- Strong project management skills and ability to plan and prioritize own work, completes work on schedule and maintains required records.
- Effective communication skills, written and oral, to all levels of the organization.
- Experience in risk management
- Understanding of LEAN manufacturing principles and Kaizen
- Experience in a leadership role; guiding and directing a team towards a common goal.
